

# VanEck Global Listed Private Credit (AUD Hedged) ETF

LEND gives investors exposure to a portfolio of 25 of the largest listed companies involved in private credit. LEND aims to provide investment returns before fees and other costs which track the performance of the Index with returns hedged into Australian dollars.

## LEND

### Benefits

#### Global listed private credit exposure

Invest in the world's largest listed private credit companies, with a portfolio that provides true diversification and a targeted exposure.

#### High-income potential

Private credit has proven to be an attractive alternative source of high income historically, commensurate with risk.

#### Exposure to a growing and sought-after asset class

Access via an ETF removes the barriers traditionally associated with this asset class.

#### Australian dollar currency hedged

The table above shows past performance of the ETF from 31 January 2024. Index performance shown prior to 2 January 2024 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

### Key risks

An investment in the ETF carries risks associated with: listed private credit, interest rates, credit/default, currency hedging, ASX trading time differences, financial markets generally, individual company management, industry sectors, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the VanEck Global Listed Private Credit (AUD Hedged) ETF PDS and TMD for more details.
